Law Enforcement Training,
Consulting and Services

bluelinetd.com

Blue Line Training and Development

provides law enforcement related classes and consulting for police officers and law enforcement professionals. We have instructed over 8000 officers and professionals across Illinois, Wisconsin, Michigan, Ohio and Montana. Training is provided through local Mobile Team Units (MTU's) as well as thru direct contracting with agencies.

We also provide consulting and speaking services to professional groups, conferences & communities on topics including:

- **Crime Scene Investigations**
- **Mental Health**
- **Crisis Intervention**
- **Domestic Violence**
- **Internal Investigations**
- **Leadership**
- **Effective Supervision**
- **Scenario Based Training**

Your department hosts the training. The department can have up to 30 of your officers in the course. You can collaborate with other departments, to include additional officers to make a class up to 30. There is no minimum number of

officers for the training to take place. Multiple departments can combine to cover payment of courses. Payment is a flat fee, per day. The flat fee is for two instructors per course, with an instructor – officer ratio of 1 to 15. This is a preferred ratio of the Training and Standards Board.

Blue Line Training and Development will coordinate with each department and local MTUs (Mobile Training Units) to obtain the mandates that count toward the Illinois Law Enforcement Training and Standards Board required mandated training hours.

For more information or to schedule training that meets required mandated training hours, contact Blue Line Training and Development.
